PROFESSIONAL SUMMARY

BSc in Data Science and Artificial Intelligence, with two years running commercial operations at an AI and enterprise software company in Dubai. The degree is active — data validation, operational reporting, and structured analysis are part of the current role. The commercial side: account management, billing, and supplier coordination across high-value clients. Both sides come from real work, not separate tracks. UAE-based, own visa, available immediately.

PROFESSIONAL EXPERIENCE

Operational Specialist Jul 2026 – Present
GenAi Technologies FZE Dubai, UAE

- Promoted from Business Specialist after thirteen months; scope expanded to cover operations across the business while maintaining the same commercial precision.
- Coordinate between technical and commercial teams, manage supplier relationships, and keep business operations running without pulling engineers away from the product.
- Maintain ERP records, track operational KPIs, and report weekly to senior management on account activity, pipeline status, and outstanding items.

Business Specialist Jul 2025 – Sep 2026
GenAi Technologies FZE Dubai, UAE

- Managed the full commercial cycle across 10+ accounts — quotations, supplier negotiation, invoice processing, and payment collection.
- Processed 50–100 invoices per week across customer, business, and supplier accounts; transaction values from AED 100,000 to AED 1,000,000.
- Maintained 100% payment collection rate across all accounts, with receivables cleared within five to seven business days through active follow-up and reconciliation.
- Ran account records, pipeline status, and payment workflows through Odoo ERP; delivered weekly revenue and outstanding balance reports to senior management.
- Negotiated pricing and terms directly with suppliers, improving margins on repeat orders.

Data Surveyor Nov 2024 – Jul 2025
Tracsis Traffic Data Ltd London, UK

- Collected and validated structured passenger data for National Rail and Transport for London across a 9-month field project covering major UK transit hubs.
- Cross-referenced passenger counts against manual records through a purpose-built mobile platform; discrepancies flagged and resolved before daily submission.
- Maintained clean, complete field data records across high-volume collection periods; all submissions signed off before upload.

Assistant Manager Dec 2021 – Dec 2024
American Candy House London, UK

- Managed daily operations for a retail F&B outlet — team of 8–10, shift scheduling, stock control, supplier coordination, and UK Food Standards Agency compliance.
- Reconciled weekly cash takings of £1,000–£6,000, investigated discrepancies, and processed payroll for 8–10 staff each week.

- Placed supplier orders, verified deliveries against purchase orders, and approved payment only on confirmed receipt.
