Professional Summary

Business specialist with a BSc in Data Science and Artificial Intelligence, currently managing commercial operations at an AI and enterprise technology company in Dubai. Experienced in account management, billing, supplier coordination, and ERP reporting across accounts ranging from AED 100,000 to AED 1,000,000. Effectively leverages technical background for core reporting, data validation, and business analysis.

Professional Experience

Business Specialist July 2025 – Present
GenAi Technologies FZE *Dubai, UAE*

- Managed the full commercial cycle across 10+ accounts at an AI and enterprise technology company, executing quotation development, supplier negotiation, invoice processing, and payment collection tracking.
- Processed 50–100 invoices per week across customer, business, and supplier accounts with individual transaction values ranging from AED 100,000 to AED 1,000,000.
- Maintained a 100% payment collection rate across all managed accounts, successfully clearing outstanding accounts receivable within five to seven business days through consistent reconciliation.
- Administered complete account records, pipeline status, and payment workflows utilizing Odoo ERP to deliver weekly reports on revenue, outstanding balances, and invoices to senior executives.
- Negotiated pricing models and contract terms directly with suppliers, resulting in improved margins on high-volume repeat business orders.
- Mitigated billing errors by systematically verifying delivery notes against inbound invoices to resolve discrepancies prior to account processing.

Data Surveyor Nov. 2024 – July 2025
Tracsis Traffic Data Ltd *London, UK*

- Collected and validated structured passenger transit data for National Rail and Transport for London across a 9-month field operations project covering major UK transit hubs.
- Cross-referenced regional passenger intake counts against manual tracking records via a custom mobile application to flag and resolve anomalies prior to daily submissions.
- Maintained high-accuracy data logs during peak volume collection windows, securing formal sign-offs for all field data before daily system uploads.

Assistant Manager Dec. 2021 – Dec. 2024
American Candy House *London, UK*

- Directed daily operations for a retail commercial establishment, supervising a team of 8–10 staff members across shift scheduling, inventory control, and UK Food Standards Agency compliance.
- Reconciled weekly cash receipts ranging from £1,000 to £6,000, investigated transaction variances, and processed structured payroll via bank transfers and cash distributions.
- Enforced strong purchase-to-pay discipline by managing supplier orders, auditing physical deliveries against procurement sheets, and authorizing payments exclusively upon verified receipt.
